Bala Murugan S	Team Member
Divya Dharshini	Team Member

Testing Approach

The supplied tests set DEMO_MODE=true and use FastAPI TestClient. This allows the application to be tested without external AI credentials.

Test Cases

- test_home – GET / must return HTTP 200 and contain ComicCraft in the response.
- test_health – GET /health must return HTTP 200 and status equal to ok.
- test_generate_json – POST /generate-comic/json must return success, exactly five panels, and a PDF path ending in .pdf.
- test_image_endpoint – GET /test-image must return HTTP 200 and success=true.

Test Command

With the virtual environment active, run: pytest -q

Validation Points

- Homepage loads successfully.
- Health endpoint reports status ok.
- Comic generation produces five panels.
- PDF path is returned after generation.
- Image endpoint reports successful generation.
